

Enterprise Incubation Management ERP & Governance System

One integrated platform for every stakeholder — from startups to investors and scheme authorities.

A Paperless Incubation Ecosystem

A comprehensive, cloud-based ERP that lets every incubator, accelerator, and university entrepreneurship cell operate on a single integrated platform. It delivers complete digitization of application, administrative, financial, and mentoring processes. Authorities monitor every startup's operations and fund utilization through one centralized dashboard — eliminating manual reports and improving transparency.

Scheme Compliance & Grant Monitoring

Every ERP module streams live data to a central compliance dashboard. Funding bodies (Schemes) can track grant tranches, verify Utilisation Certificates (UCs), and ensure funds are spent accurately against approved budget heads.

Continuous Progress Tracking (SPR)

Startups submit Startup Progress Reports (SPR) periodically. The system automatically assesses their performance (Product Validation, Traction, Revenue Growth), providing a quantifiable "Health Score" to identify risks early.

One Platform. Ten Integrated Modules.

MODULE 01: Application & Review Management

End-to-end multi-stage application pipeline. Auto-generates NDAs and Incubation Agreements (Form C).

MODULE 02: Startup Management · 360°

A complete, unified record spanning founders, IP, funding history, and startup stage.

MODULE 03: Finance, Grant & Utilisation Management

Full financial lifecycle. Allocates Scheme Grants to Startups, manages multi-tranche disbursements linked to milestones, and tracks Utilisation Entries.

MODULE 04: Mentorship & Expert Network

Tracks Mentor profiles, availability, and scheduling. Facilitates Mentorship Assignments.

MODULE 05: VC & Deal Flow Management

Dedicated pipeline for Venture Capitalists. Manages VC firm onboarding, tracks investment interest stages.

MODULE 06: Event & Demo Day Management

End-to-end event planning. Manages Pitch Deck submissions, Event RSVPs.

MODULE 07: Live Pitch Scorecard System

A real-time scoring system for Demo Days. Assigned judges use their devices to submit live scores.

MODULE 08: Coworking & Resource Management

Physical workspace allocation tracking: Buildings, Floors, Zones, and Resources (Desks, Cabins).

MODULE 09: Inventory & Asset Management

Physical and digital resource tracking. Manages Inventory Items, assignments, and maintenance.

MODULE 10: Communication & Notification Engine

Unified multi-channel communication (Email, In-App). Supports bulk Announcements.

Technology Requirements

Cloud-based multi-tenant architecture · API-first design · RBAC (Role-Based Access Control) · Automated Agreement Generation (Templating Engine) · End-to-end audit logs · Document Management System · Data Encryption · PostgreSQL & Node.js backend.
